EXPERIENCE

Junior Researcher/Teaching Assistant

University of Luxembourg

📅 2024–curr 📍 Belval, Luxembourg

- Conducted research on various topics in mathematical logic
- Taught exercise sessions for bachelor's students in mathematics and physics.

Private Lessons

Private practice

📅 2017 - 2023 📍 Various locations

- I gave private math tutoring to a lot of students in middle school, high school, for the admission in university and in university too. Seeing them succeed gave me a lot of satisfaction and it was good practice in communication.

Stage

Seitron SPA

📅 June 2017-Sept 2017 📍 Mussolente (VI)

- Stage as a general employee at Seitron SPA for "Alternanza Scuola-Lavoro" (school-work alternance) project. Assisted first-hand in making, boxing, and testing of thermostats and heater-fumes testers. Learned the basics of working in a company.

PROJECTS

Haaveilla

Inter-school Journal

Editor and help-director in an inter-school journal project founded in my hometown. Unfortunately it became one of the countless Covid victims since nobody was at school to read it for almost a year.

I wrote mostly about mathematical stuff I found interesting. I believe studying the material for the first article I ever wrote (about complex numbers) when I was 16 is what inspired me to study maths later in life.

Helped me learn some $\text{\LaTeX}$ and TikZ along the way.

Videomaking projects

Multiple videos

📅 2017-2020

Directed, filmed, edited and color-graded half a dozen small video-graphic projects to promote events, projects and to help some friends realize their artistic vision. I absolutely loved working on those, often using creative problem solving and teamwork to build something that in the end looked pretty good.

MY LIFE PHILOSOPHY

"If it doesn't work then it will make for a fun story"

MOST PROUD OF

Haaveilla

helped manage and helped grow that fantastic little journal

"My" students

helped some students with their math exams and saw them succeed

STRENGTHS

Problem Solver

Fast Learner

Sense of humour

Cooking skills

Algebra

Programming

Photoshop

LANGUAGES

Italian

English

French

EDUCATION

PhD in Mathematical logic

University of Luxembourg

📅 2024– curr 📍 N/A

Algebraic and coalgebraic aspects of polyhedral semantics for modal logic

M.Sc. in Mathematics

ALGANT (Concordia University/UniPD)

📅 2022 – 2024 📍 110L/110

Thesis: Streamlining scheme theory with topoi

B.Sc. in Mathematics

Università degli studi di Padova

Mathematics stuff

small papers, projects, proofs

📅 Various dates

Written small amateur unpublished articles, from which probably the most interesting would be a proof of the equivalence between a presented problem (minimal number of players for the guaranteed existence of two balanced teams) and an open one (Ramsey numbers).

📅 2018 – 2022

📍 94/110

Thesis: The adjoint functor theorem and some applications

Technical High school degree

ITIS E.Fermi

📅 2014 – 2018

📍 82/100

Project: The making of a 3-axes gimbal
